# December 2014

# Seattle Chinatown-International District Retail Market Analysis and Business Attraction and Retention Strategy

Submitted to the Seattle Chinatown International District Preservation and Development Authority and the Seattle Chinatown International District Business Improvement Area

# Introduction

In July 2014, the Seattle Chinatown International District Preservation & Development Authority and the Chinatown International District Business Improvement Area engaged Larisa Ortiz Associates (the "Consultant") to provide market research, a strategic plan for business attraction and retention, and marketing materials to business attraction for the Chinatown-International District (C-ID). This Executive Summary offers readers an overview of key findings and recommendations from the study.

# Methodology

# **Assess the District and Business Mix**

The Consultant began with a *physical analysis* of the district. This was done with an eye towards the district characteristics that undergird a successful business environment, including physical conditions, cleanliness and safety, visibility, access and business and residential density. We then considered the **business mix** by analyzing the district's size and geographic pull within the region. We completed an **asset matrix** that identified significant and catalogued visitation rates, to anchors and visitation drivers, as well as proximity to key destinations.

# **Community Outreach**

The Consultant conducted **stakeholder and merchant interviews**, which allowed us to understand the driving vision for the area, the challenges that businesses face, as well as provide insight into the retail mix that might better satisfy customers. We worked with our on-the-ground partners to identify key merchants, property owners, and residential leaders to interview who shed light on the major strengths, weaknesses and needs of the district. These interviews helped us to uncover opportunities to build capacity among local organizations or community leaders to undertake commercial revitalization work.

### **Market Analysis**

Based on interviews, the analysis of the business mix, physical conditions and access, coupled with our experience working in similar urban business districts, we *defined and analyzed a primary and secondary* trade area. In the case of the C-ID, Uwajimaya, host to more than 2 million annual visitors shared their visitor and zip code data, which allowed us to more accurately define the geographic areas from which existing customers are already coming. The top zip codes by sales included the communities in the immediate vicinity of the C-ID, including 98104 (Chinatown International District and Pioneer Square), 98144 and 98122 (Capitol Hill and the northern portion of the Central District), followed by 98105 (University of Washington). Additionally, we considered transit access and proximity of the 98101 zip code (Downtown Seattle) and incorporated that into our trade area analysis. Our primary trade area therefore included 98104 and 98101. Our secondary trade area included 98144, 98122 and 98105.

# **Retail Attraction Strategy**

The market analysis serves as the foundation of a *retail attraction strategy* that emphasizes improving the physical environment and working with existing property owners in advance of vacancies, while simultaneously targeting specific retail categories and opportunity sites. The appendix of this report contains tools to carry out the tasks delineated in the retail attraction

strategy, including scout cards for evaluating tenant prospects and a sample prospect database.

# **Deliverables**

Our work resulted in three key deliverables:

- 1) Executive Summary (this document) that summarizes significant findings;
- 2) A PowerPoint presentation of the comprehensive findings as well as recommendations for strengthening the retail environment (The PowerPoint presentation is included as an appendix to this document); and
- 3) Fully designed marketing materials to use in the retail attraction effort.

# **Key Findings**

# **Physical Analysis**

The boundaries of the Chinatown-International District are generally considered to be 4<sup>th</sup> Avenue South to the west, Yesler Way to the north, Rainier Avenue South to the east and South Dearborn Street to the south.

# E Spruce St Swishington St South S

# Study Area

Figure 1: Study Area Map. Larisa Ortiz Associates.

# **Gateways and Connections**

Major gateways to a neighborhood or shopping district often play a significant role in shaping visitor perception of the area, which in turn affects their likelihood of returning. The Chinatown-International District has two key gateways  $-5^{th}$  Avenue and King Street and  $5^{th}$  Avenue and Jackson Street. Each gateway has challenges to be addressed and strengths to build upon. Because these are important intersections, strengthening these areas is a high priority.

5 <sup>th</sup> Avenue & King Street	5 <sup>th</sup> Avenue & Jackson Street
Strengths: Symbolic Arch	Strengths: New streetcar
Major transportation hub	Historic terminal
Significant office worker population	New Bartell's drugstore
Challenges: Physical disinvestment	Challenges: Limited retail at this intersection
Loitering	
Publix – currently a vacant, derelict	
building	
Opportunity: Publix redevelopment	Opportunity: New streetcar will drive visitation

The physical distance and the uphill climb between Little Saigon and Chinatown create two somewhat distinct markets that function independently for most visitors. That said, there are ways to enhance and encourage visitors to traverse the area that currently functions as a barrier – the underpass below I-5 – with art and light installations. Examples of similar programs are included in the PowerPoint presentation.

# **Access and Transportation**

The Chinatown-ID has excellent access via public transit, with nearly 384,000 riders using neighborhood transit every day. The ease of access ensures that the district remains a destination for visitors from other communities throughout Seattle. A few new initiatives will further reinforce the area as a transit hub, notably new transit options that include the following:

- First Hill Streetcar (2015) will bring 3,000 daily riders to the area, and provide enhanced connections between C-ID to Capitol Hill & Pioneer Square
- Central Link Light Rail (2017)
- Downtown Streetcar (proposed)

### Pedestrian Counts

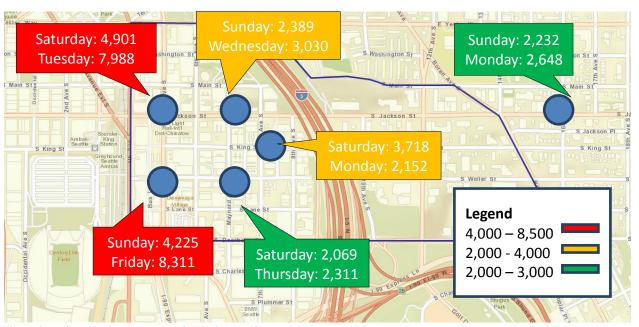

Figure 2: Pedestrian Count Map. Larisa Ortiz Associates

Pedestrian counts are greatest along King Street, the two most significant gateways to the Chinatown-ID. Weekday counts at those locations are nearly double the weekend counts, reaffirming the strength of the daytime office worker market and the transit hub located there. The counts from within the district suggest that weekday and weekend counts are more or less the same. The intersection of Jackson/Maynard is slightly busier than Jackson/12<sup>th</sup> on any given day.

### **Business Mix**

The District has a mix of soft goods (clothing, accessories, and fabric), grocery stores, gift and hobby stores, and Asian specialty goods across multiple retail categories. Many of these businesses serve local residents as well as visitors from outside the neighborhood seeking authentic Asian or international offerings. Businesses are clustered in multiple nodes throughout the District, including S Jackson Street from 6<sup>th</sup> Avenue and 7<sup>th</sup> Avenue, Maynard Ave from S Lane Street to S Weller Street, 5<sup>th</sup> Avenue between S Dearborn Street and S Weller Street, and 12<sup>th</sup> Avenue and S Jackson Street.

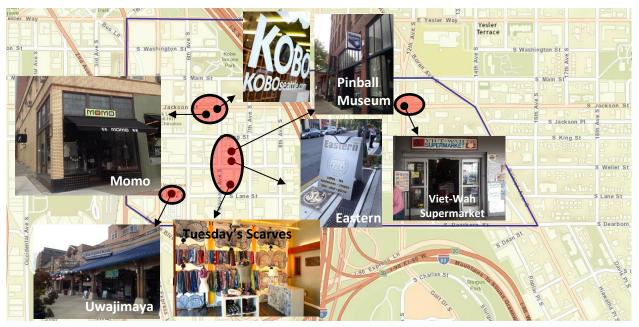

Figure 3: Retail Nodes Map. Larisa Ortiz Associates.

# **Looking Forward (New and Planned Development)**

There is significant new development taking place throughout the District. There are 825 new residential units that are either planned or under construction, as well as 12,000 square feet of retail, a Hampton Inn hotel and the expansion of Hing Hay Park. These new developments will help to grow the customer base for local businesses.

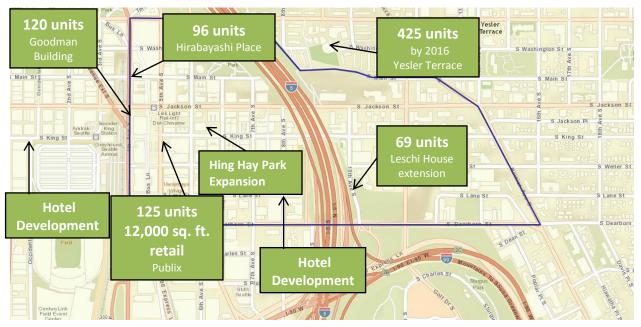

Figure 4: Development Map. Larisa Ortiz Associates.

Link Field, WaMu Theater, and Safeco Field) on the periphery of the neighborhood that attract millions of visitors annually. Together, these destinations draw over eight million visitors to the neighborhood every year.

			25,000 visitors/year	Chinese Gate	

# **Market Analysis**

### **Trade Area**

The Chinatown-International District's businesses serve both neighborhood residents as well as visitors from outside of the neighborhood. This suggests a primary trade area that encompasses the Chinatown-ID and nearby neighborhoods, and a secondary trade area who visit the District for its specific offerings and destinations rather than convenience.

Because of public transit and major streets traveling north/south, the primary trade area is defined as the Chinatown-ID, and the zip codes 98104 and 98101. Zip code information from an anchor tenant, Uwajimaya, was analyzed to determine the secondary trade area. Data revealed that the highest number of visitors from outside the immediate area reside within zip codes 98144, 98122 and 98105 (see Fig. 5 below).

Figure 5: Chinatown-International District Trade Area Map.

Data was obtained for each of these geographies in order to understand the wide variety of the Chinatown-ID's customers.

# **Demographics**

The table below shows key demographic data for each zip code in the primary and secondary trade areas. The Chinatown-International District is primarily located in zip code 98104, with a small section of the neighborhood falling into 98144.

### **Primary Trade Area**

### **Secondary Trade Area**

	C-ID	98104	98101	98144	98105	98122	Seattle

Figure 6: Trade Area Demographics. Source: U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2014-2019.

### The Chinatown-International District

There are 3,473 residents of the Chinatown-International District. The District itself is projected to experience less growth in population and income than the other communities within the trade area and the city of Seattle as a whole, however some growth is projected to occur, suggesting stability and positive change. The District is less dense than the surrounding neighborhoods. Residents are significantly older, with a median age of 51. The large share of older residents is likely one of the factors leading to a low median household income, as older residents are more likely to be on fixed incomes or retired and living on savings.

### **The Primary Trade Area**

Projected population growth rates, median household income, income growth rates, density and educational attainment increase in the two additional zip codes that make up the primary trade area. Significantly higher population and income growth is anticipated for 98101, to the north of the District, which includes part of Downtown. Growth and development in this area may "spread" south to the District in the future if housing costs rise and as new transit is built.

### The Secondary Trade Area

The secondary trade area is comprised of zip codes with residents whose incomes are higher and whose ages are lower than that of the primary trade area. These visitors, who typically live further from the District than residents of the primary trade area, are likely to visit the District for specific businesses or activities that reflect the area's rich cultural identity. This presents an opportunity for new and existing businesses to cater not only to low- and moderate-income residents of the neighborhood, but also visitors with more disposable income to spend on retail, dining and entertainment.

# **Psychographics**

Esri Business Analyst, a leading provider of mapping, retail and market data, has created a psychographic categorization system called *Tapestry Segmentation*, which divides residential areas into segments based on socioeconomic and demographic characteristics. These categorizations paint a more vivid picture of who is living in the trade area and what their habits and preferences are, and is a tool frequently used by retailers to aid in site selection decisions. There are 65 unique segments in total. The majority of residents in the primary trade area fall into the *Social Security Set* and *Uptown Individuals* category. The majority of residents in the secondary trade area fall into *Uptown Individuals* and *Scholars*. The following brief bullet points describe the segments that make up the District's trade areas. Full descriptions of each segment can be found at esri.com/data/esri\_data/tapestry.

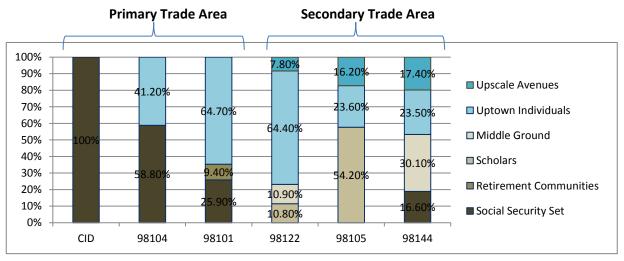

Figure 7: Primary and Secondary Trade Area Psychographics. Source: Esri BAO 2014; Larisa Ortiz Associates.

### **Social Security Set**

- Eats at home, fast food eateries are restaurants of choice
- ➤ Household Income: \$16,000

### **Uptown Individuals**

- Shop at Trader Joe's and Whole Foods
- Shop for clothes at Banana Republic, The Gap, Nordstrom
- Enjoy wine bars and restaurants
- Active on Social Media
- Household Income: \$52,000 \$93,000

### > Shop at department stores

### **Retirement Communities**

- Like to travel
- Watch QVC, Golf Channel, CNN and Sports
- Household Income: \$35,000

# Scholars

- Younger, transient lifestyles and life stage
- Pursuing college degrees
- Shop at discounts stores, prefer branded clothing
- Eat at convenient quick-service restaurants
- Enjoy activities (sports, working out)
- Household Income: \$24,047

# **Workforce and Employment**

The District is located within walking and public transit distance of downtown Seattle, which has a high density of employees. This close proximity presents an opportunity for the District to attract workers on their lunch break or after work.

Zooming in more closely to the zip code 98104, which includes the majority of the District as well as downtown, 68% of employees earn more than \$3,333 per month, or roughly \$40,000 annual salary. This suggests a daytime and evening population with higher incomes than local residents, whose median annual household incomes are \$12,996. Additionally, the local workforce has high educational attainment, with over 40% of employees holding a Bachelor's degree or higher.

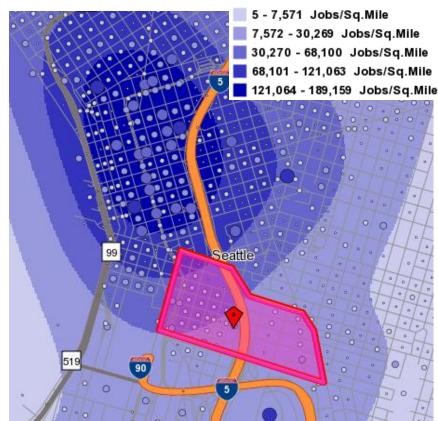

Figure 8: Employment Density Map. Source: 2010 Census, 2002-2011 Origin Destination Employment Statistics

# Jobs by Worker Educational Attainment

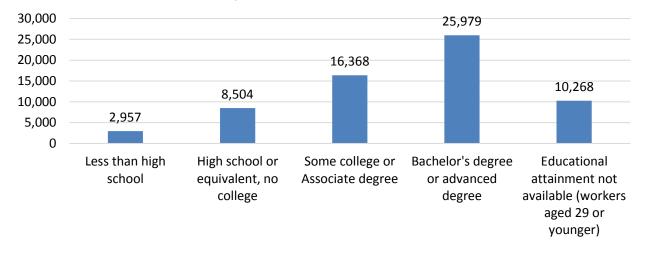

Figure 9: Jobs by Worker Educational Attainment. Source: U.S. Census Bureau, Census 2010 Summary File 1. Esri forecasts for 2014.

# **Retail Supply, Demand and Leakage**

Market data confirms that the District is a destination for people visiting from outside of the neighborhood. Seventy-six percent (76%) of the dollars spent in the District are by non-residents. The table below shows the consumer demand (consumer

spending) among residents of the primary trade area, compared to retail sales of businesses. A negative retail gap means there is a surplus in that category, or that supply is exceeding local demand. This signifies that non-residents are coming into the area to shop. A positive number in the retail gap column shows that demand from residents in the trade area exceeds local supply of goods and services, or that local residents are leaving the neighborhood to shop for goods in these categories. It may also suggest an opportunity for stores in those categories to locate in the District, or for existing retailers to carry goods in those categories. In the C-ID, the only

categories with a "gap" or "retail leakage" are gas stations, motor vehicle and parts dealers and general merchandise. In pedestrianoriented urban areas, it is common to have leakage in gas and

# **Total Spending on Retail Sales, Food & Drink**

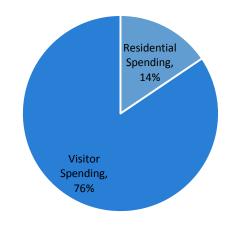

Figure 10: Total Spending on Retail Sales, Food & Drink. Source: Esri and Dun & Bradstreet.

motor vehicle categories and it does not suggest that these types of uses should be pursued.

	Demand	Supply	Retail Gap	
Industry Summary	(Retail Potential)	(Retail Sales)		
Total Retail Trade and Food & Drink	\$22,387,556	\$157,302,536	-\$134,914,980

# **Strategy Recommendations**

# Who is the Target Customer?

Customer profiles are useful tools to help refine retail mix so that is serves to further enhance the appeal of the district to each targeted customer segment.

The study revealed that the C-ID has four main customer segments. It is notable that three of these customer segments are visitors to the district. In fact, 76% of all spending in local businesses comes from **non-residents**. The customer groups outlined below already visit the District for goods and services. Getting them to stay in the District for longer periods of time and spend more discretionary income during each visit will depend on increasingly the kinds of retail, activities and services that these customers are looking for.

Students/Young Professionals

Tourists/Visitors

Office Workers

Residents

# **Students/Young Professionals**

Students and young professionals primarily hail from the secondary trade area, including zip codes 98122 (i.e., Capitol Hill, Central District) and 98105 (i.e., University of Washington).

They arrive to the District by public transit or by car. The recently completed First Hill Street car will provide enhanced direct public transit access to both communities, making the District a more convenient place to visit for retail, food and services. Ridership is estimated at 3,000 daily passengers.

These customers are already visiting the District, and currently patronize Uwajimaya for groceries, or local restaurants for affordable, authentic food. International students come to the area seeking familiar sights and smells.

In addition to inexpensive dining options, this customer is seeking entertainment activities, including music, dancing, karaoke, movies and museums during the weekends and after-work.

### **Office Workers**

Office workers primarily hail from the immediate area surrounding the District. In the 98104 zip code (which encompasses most of the District), there are 64,076 workers, 68% of whom make over \$40,000 annually. They are also well-educated; 40% of all workers have bachelor's degree or advanced degrees, while 26% have some college or associates degree.

While office workers currently patronize local businesses, particularly during lunch, these customers seek a variety of foods, not simply options limited to Asian cuisine. They also seek dining and after-work offerings, including light food and drinks with colleagues and friends.

Office workers in the downtown are also a potential customer base. While the end of the Ride Free Area in September of 2012 resulted in a decline in lunch time office worker visitors, many do not know that the two-hour transfer window, when making multiple bus trips using an ORCA card, allows for a discounted round trip fare that costs the same as a one-way. Marketing and promotional efforts may be in order to communicate this discount fare to downtown office workers who are within a few minutes ride of the District.

# **Tourists/Visitors**

Tourists and visitors are a significant and growing piece of the local customer base. Visitors hail from throughout the region. Many are also tourists visiting Seattle from other states and nations. They go to the District to stay at the area hotels (American Hostel has 35,000+ visitors annually and there are two new hotels under construction) or at local Airbnb rentals (of which there are 30 listings in the neighborhood as of October 2014). Additionally, go to games at Century Link and Safeco Field, combined see nearly 5,000,000 visitors combined annually. The Wing Luke and the Theatre Off Jackson also generate significant visitation, hosting 40,000 and 20,000 visitors annually, respectively.

Like students and young professionals, these customers seek entertainment activities and authentic experiences, as well as evening and weekend options for food and drink.

### **Residents**

Residents live locally and are already loyal customers to many of the local ethnic business.

These customers seek convenience goods and services, including authentic, affordable full-service restaurants and quick service restaurants (QSRs). While most residents are low-income seniors on limited incomes; they are frequent shoppers for groceries and other convenience goods.

# What can we do to better serve the Target Customer?

# Objective 1: Set the Stage for successful retail attraction by improving the business environment.

Issues of cleanliness and safety loom large in the public consciousness. The physical analysis and stakeholder interviews further reinforced the fact that these concerns continue to undermine local businesses. Addressing these issues will ensure that all area businesses continue to grow their customer base and that new businesses thrive. The more comfortable a visitor to the district feels – the more they will be willing to return again and recommend area businesses to others.

### **Strategy 1: Address issues of cleanliness**

Addressing issues of cleanliness and deferred maintenance of buildings and public space go hand in hand with issues of public safety. In some cases, public safety concerns are based on perceptions that are further reinforced by an environment that required upgrades and improvements. To address these issues, the BID is spearheading a number of efforts that focus on these challenges, including:

- Increase cleaning to 7 days a week
- Fully implement Clear Alley Program throughout the district

- targeted façade/signage improvement
- Host volunteer cleaning events like the C-ID Spring Clean

# Strategy 2: Address issues of public safety

Left unchecked, public safety concerns will hamper efforts to strengthen the retail mix. The BID is also leading efforts to improve public safety within the district, including:

- Coordinate with incoming development (e.g. the Publix Hotel and the Icon/Bartells development) to leverage investment to improve surrounding area.
- Explore a public safety ambassador program.
- Engage with City/Services to track and troubleshoot homelessness, mental illness, and criminal activity issues in the district.

# **Objective 2: Advance a targeted retail attraction effort**

A targeted retail attraction strategy means defining the retail vision and pursuing retail and food service providers that will improve the overall tenant mix for a defined customer base.

Focus your marketing efforts on retail categories that will improve the mix for the customer segments outlined in this report.

### **Strategy 3: Enroll property owners**

- Share market data and marketing material in one-on-one meetings with property owners. Tell them about your targeted retail attraction strategy and request their formal commitment to allow you to show their vacant retail spaces. Ask them when their existing retail leases expire so that you can prospect for potential tenants in advance of pending vacancies. Consider obtaining MOUs from property owners to formally enroll them in the retail attraction efforts.
- Catalogue and maintain vacancy lists so that you are always in a position to speak with and
  potentially show interested prospects available spaces. Be sure to keep lease expiration
  information in the same database so that you can keep on top of vacancies before they
  occur.

# **Strategy 4: Create opportunities for connections**

- Host a "real estate open house" on a weekday or weekend morning. Over the course of a few hours, participating property owners commit to allow their space to be viewed. The event can begin with a few speakers who serve to orient participants (a map of the open house locations can be provided, as well district marketing material, among other hand outs) to the open house, share the market analysis. Some communities elect to invite small business service providers to set up booths so that interested tenants can also familiarize themselves with the host of small business technical assistance tools and providers in the local marketplace.
- In between real estate open house events, be the "Retail Ombudsman". Actively reach out to potential tenants; offer to give district tours and coordinate viewing of available spaces.

# **Strategy 5: Prospecting for Tenants**

- Visit similar districts and use these opportunities to identify potential tenants.
- Get referrals from existing merchants about other retailers.
- Consider developing a "Retail Task Force" made up of interested parties who are willing to eat shop and visit other communities and bring back potential prospects. Meet once a month to discuss a few targeted retailers who will be pursued in the following weeks.
- Maintain a robust database of retail prospects that ensure timely follow up. Include the following information:
  - o Business Contact Information
  - Broker Contact Information
  - Lifestyle/price point
  - Square footage requirements
  - Desired rent
  - Other locations
  - Strength of prospect (hot/warm/cold)
  - o Follow up time frame

# **Strategy 6: Recognize Success**

 Build credibility and attract more retail by supporting every grand opening with a ribbon cutting and issue press releases. Use these opportunities to communicate with the public about the retail attraction effort.

# Seattle Chinatown International District Retail Market Study

Final Presentation
November 2014

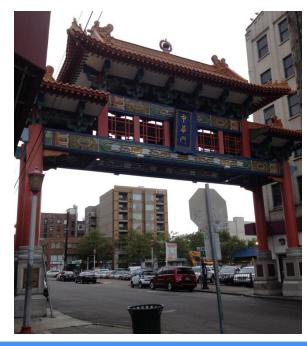

# **PHYSICAL ANALYSIS**

# **Physical Analysis**

# Gateway: 5<sup>th</sup> & King

- Symbolic arch
- Physical disinvestment
- Loitering

# **Physical Analysis**

Gateway: Jackson & 5<sup>th</sup>

- New street car
- Historic terminal
- New drugstore (Bartell's)

# **Physical Analysis**

# **Barriers to Connectivity**

- Between Little Saigon and Chinatown
- Uphill climb further deters connections

 Along King Street – limited entrances/exits

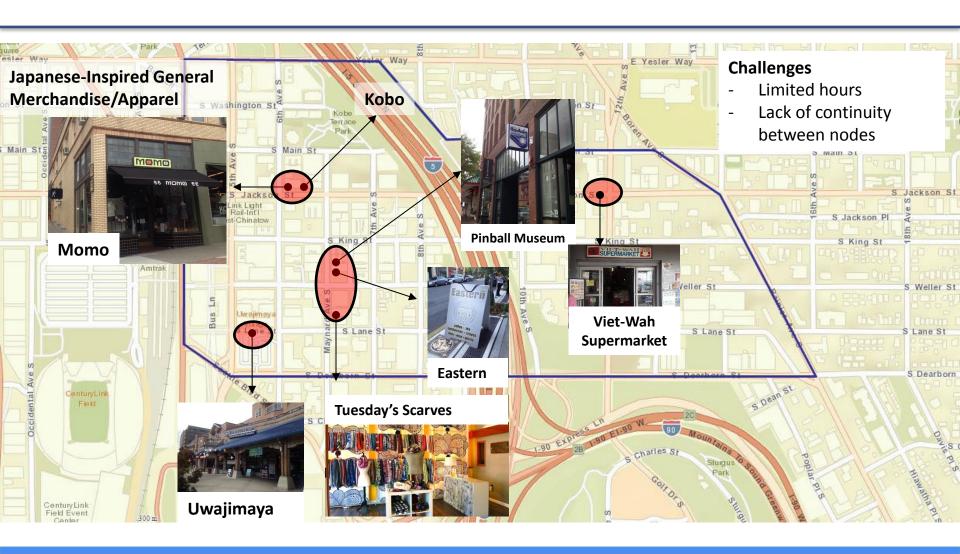

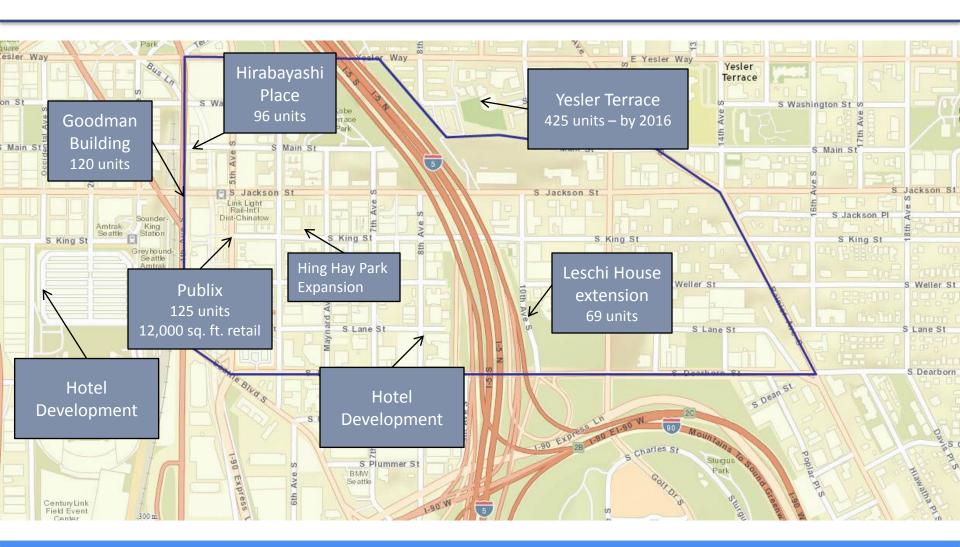

# **Concentrated "Soft Goods" Retail Offerings**

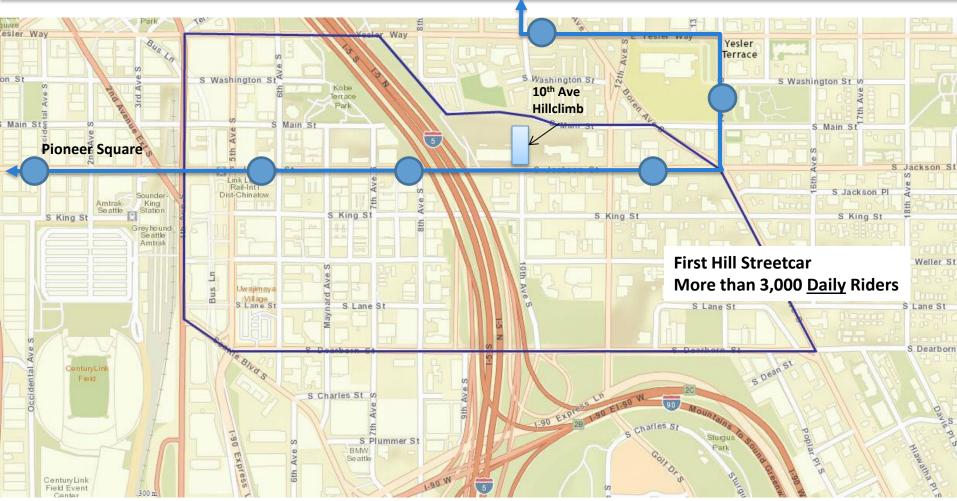

# **New Residents**

# **New Visitors/Improved Access**

To Capital Hill/
Seattle University (7,400 students)

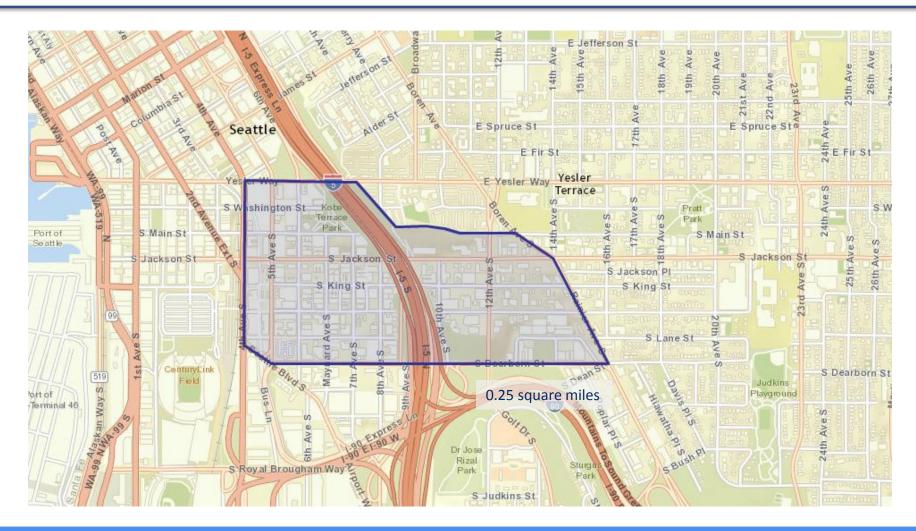

# **Transportation**

- Excellent access supports the C-ID as a destination for residents of other neighborhoods
- New transit can grow the secondary trade area
  - First Hill Streetcar (2015)
  - Central Link Light Rail (2017)
  - Downtown Streetcar (proposed)
  - Waterfront Trolley (Proposed)
- 384,000 riders using neighborhood transit every day.
- Additional 3,000 daily riders expected on new First Hill Streetcar connecting C-ID to Capitol Hill & Pioneer Square

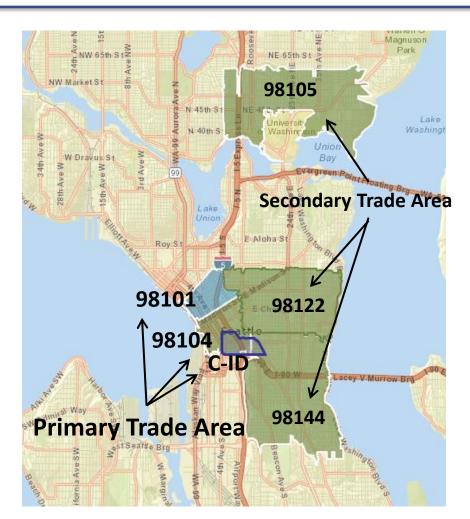

# TRADE AREAS

# **Chinatown-International District Neighborhood Study Area**

# Chinatown International District Customers *Additional Areas for Analysis*

- The C-ID is a destination. Many of the neighborhood's customers visit from outside the area.
  - Areas in Green: Top four zip codes of Uwajimaya customers
  - Light blue: (Potential) additional source of customers due to proximity and strong north/south transit.

# **Neighborhood and Trade Area Data**

# The neighborhood is:

- Growing slowly
- Lower income
- Older

- More dense than the City overall; less dense than nearby communities
- Able to pull customers from nearby areas that are growing in population and income.

	C-ID	98104	98101	98144	98105	98122	Seattle

**Employment Statistics** 

#### Job Counts by Earnings in 2011

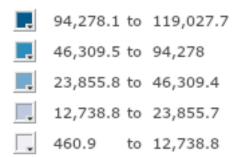

## **Employment - 98104**

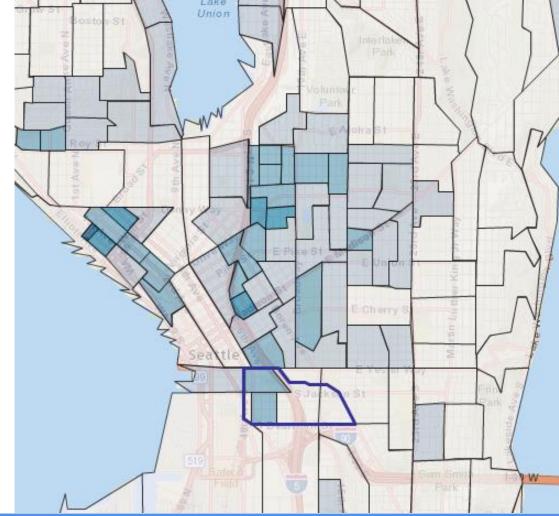

REVISED Final Presentation, Oct. 31 2014

# **Population Density**

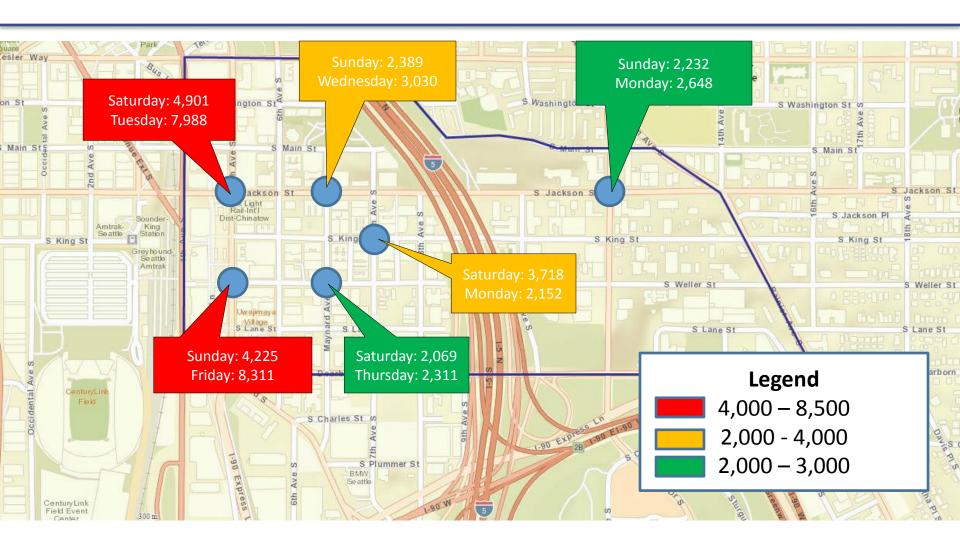

- Residential density in the neighborhood varies
- There are more dense areas to the north west
- Neighborhood businesses draw visitors from other areas

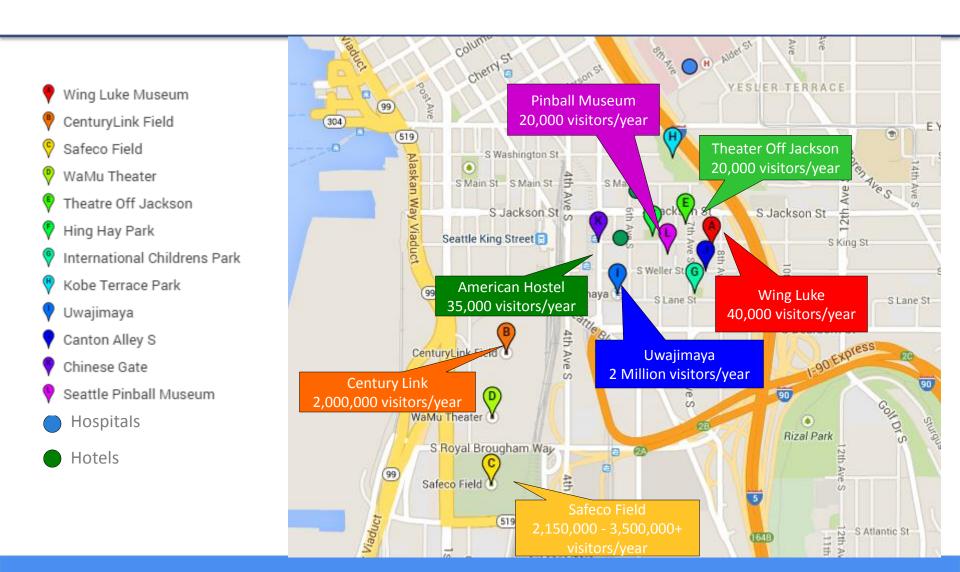

Source: 2010 Census, ESRI

# 2014 Daily Pedestrian Counts (8am – 7pm)

## **Anchors and Destinations**

## **Event Marketing Draws over 100k Annually**

- ➤ Lunar New Year & \$2 Food Walk (one day): 20,000 people
- ➤ Dragon Fest & \$2 Food Walk/July Night Market (two days): 30,000 people
- > September Night Market (one day): 25,000 people

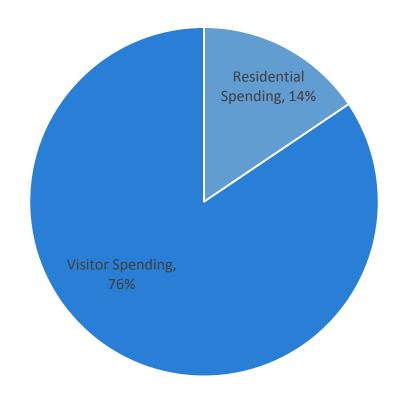

# **MARKET DATA**

## **Retail Sales**

Visitors drive 76% of retail spending in the district

Total Spending on Retail Sales, Food & Drink

## **Stakeholder Feedback**

## Retail Environment: Opportunities

#### > Strong Anchors

- Uwajimaya, 2 million annual visitors
- > Stadiums (CenturyLink, Safeco), 5+ million annual visitors
- ➤ Wing Luke, 40,000 annual visitors
- > Excellent Access
  - Existing transit @ King Street Station, 384,000 daily riders
  - Pending streetcar along Jackson
- ➢ Growing population within trade area − both income and # of households
- Strong Brand
  - Affordable
  - Chinese/Vietnamese/Japanese/Asian "inspired"
  - Food offerings

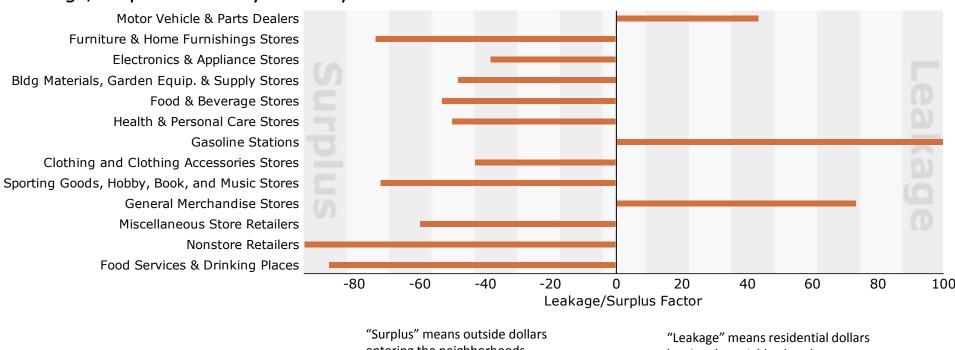

# Leakage

- Market data confirms the C-ID is a destination for people living outside of the neighborhood
- There is a "surplus" in nearly all retail categories.
- There is opportunity for General Merchandise stores

industry Summary	NAICS	<b>Demand</b> (Retail Potential)	<b>Supply</b> (Retail Sales)	Retail Gap

# Leakage

#### Leakage/Surplus Factor by Industry Subsector

entering the neighborhoods

leaving the neighborhood

# **STRATEGY**

## **Stakeholder Feedback**

## Retail Environment: Challenges

#### Clean/Safe

- Public safety concerns loitering, panhandling, etc.
- Cleanliness particularly alleys
- Deferred maintenance of buildings

#### Physical Environment

King Street - reticent owners, lack of ground floor continuous retail, loitering at corner of 5th and King

#### > Retail Offerings

- ➤ Mixed review of food offerings some quality concerns
- Limited non-food retail offerings reduce opportunity to cross-shop

#### Real Estate Redevelopment/Ground Floor Vacancies

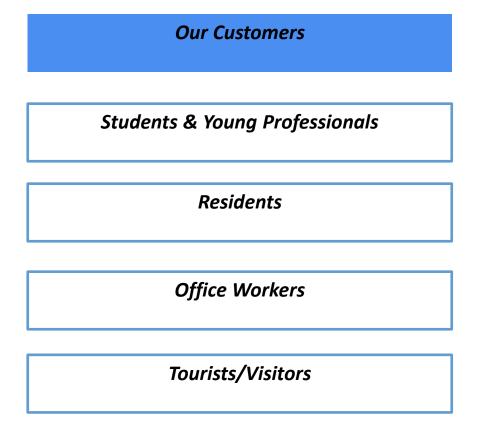

Stymied in some cases by the relative isolation of the Chinese community - difficulty renting space from Chinese owners owing to language and culture differences

#### Access becoming less convenient for traditional customer base

- Stricter parking regulations
- Loss of free travel zone
- Net loss of parking in South Downtown (stadium related)

# Who are your customers?

Customer profiles allows you to better identify strategies and activities that will appeal to each customer segment.

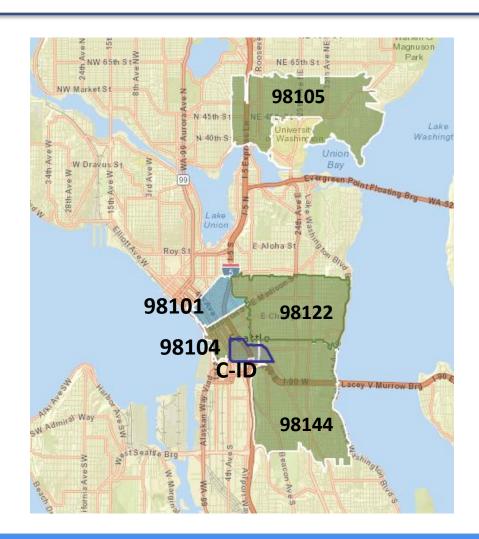

# Where are your customers coming from?

Location of your customer base informs marketing efforts

Your customers are based in the following communities:

- Primary: C-ID, 98104, 98101

- Secondary: 98144, 98133, 98105

# Students and Young Professionals

## Why?

- Already visiting
- Strong International student base seeking familiar food
- Ease of access to areas where they live
- New streetcar will enhance convenience

## **Targeted Retail Focus**

- Entertainment activities, including music, dancing, karaoke, movies, museums
- After-work/weekend options for food, beers and wine

### **Residents**

## Why?

- Live locally
- Already loyal customers

## **Targeted Retail Focus**

- Convenience goods
- Authentic, affordable full-service restaurants
- Quick Service Restaurants (QSR) offering affordable price points

#### **Office Workers**

## Why?

Located in immediate proximity and downtown

## What they want:

- Quick Service Restaurants (QSR) offering affordable variety
- After-work options for light food and drinks

#### **Tourists**

### Why?

- Already staying at hotels in the area
- Visiting for unique offerings and culture
- 30+ Airbnb rentals in the neighborhood

### **Targeted Retail Focus**

- Entertainment activities, including music, dancing, karaoke, movies, museums
- Evening and weekend options for food and drinks
- Quick Service Restaurants (QSR) offering a variety of price points

### Where?

## Why?

- Already staying at hotels in the area
- Visiting for unique offerings and culture
- 30+ Airbnb rentals in the neighborhood

## **Targeted Retail Focus**

- Entertainment activities, including music, dancing, karaoke, movies, museums
- Evening and weekend options for food and drinks
- Quick Service Restaurants (QSR) offering a variety of price points

# Strategies for Retail Attraction

Objective 1: Set the Stage for successful retail attraction by improving the business environment.

# Strategy 1: Address issues of cleanliness

- Clear Alley program
- Façade/signage improvements
- Regular street cleaning

# Strategy 2: Address issues of public safety

- Development of Publix will help improve 5<sup>th</sup>/King intersection
- Public safety ambassadors
- Lighting studies
- Consider efforts to address needs of homeless/vagrant population

# Strategies for Retail Attraction

### **Objective 2: Advance a targeted retail attraction effort**

# Strategy 3: Enroll property owners

- Share market data and marketing material in oneon-one meetings
- Request their formal commitment and allow you to show their spaces
- Catalogue and maintain vacancy lists

# Strategy 4: Create opportunities for connections

- Hold quarterly or bi-annual "C-ID Real Estate Open House" event
- Be the "Retail Ombudsman" offer to give tours and coordinate viewing to prospects

# Strategies for Retail Attraction

### **Objective 2: Advance a targeted retail attraction effort**

### Strategy 5: Prospecting

- Visit similar districts to identify potential tenants.
- Get referrals from existing merchants about other retailers.
- Consider a "Retail Task Force" comprised of local stakeholders who are empowered to eat, shop and visit other districts and can bring prospects back to the team.
- Maintain a robust database of retail prospects that ensure timely follow up. Include the following information:
  - Business Contact Information
  - Broker Contact Information
  - Lifestyle/price point
  - Square footage requirements
  - Desired rent
  - Other locations
  - Strength of prospect (hot/warm/cold)
  - Follow up time frame

### Strategy 6: Recognize Success

- Build credibility and attract more retail by supporting every Grand Opening with a ribbon cutting, issue press releases
- Use Grand Openings to further reinforce to press and partners how new the retail reflects the retail vision and overall strategy

### Demographic and Income Profile

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.

#### **Top Twenty Tapestry Segments**

		2014 H	2014 Households		2014 U.S. Households	
			Cumulative	C	umulative	
Rank	Tapestry Segment	Percent	Percent	Percent	Percent	Index
1	Social Security Set (9F)	58.8%	58.8%	0.8%	0.8%	7301
2	Metro Renters (3B)	34.2%	93.0%	1.5%	2.3%	2,308
3	Laptops and Lattes (3A)	7.0%	100.0%	1.0%	3.3%	666
	Subtotal	100.0%		3.3%		

#### Top Ten Tapestry Segments Site vs. U.S.

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.

#### **Top Twenty Tapestry Segments**

		2014 H	ouseholds	2014 U.S. H		
		C	Cumulative	Cumulative		
Ran	k Tapestry Segment	Percent	Percent	Percent	Percent	Index
1	Metro Renters (3B)	61.4%	61.4%	1.5%	1.5%	4141
2	Social Security Set (9F)	25.9%	87.3%	0.8%	2.3%	3,217
3	Retirement Communities (9E)	9.4%	96.7%	1.2%	3.5%	778
4	Laptops and Lattes (3A)	3.3%	100.0%	1.0%	4.5%	312
	Subtotal	100.0%		4.5%		

#### Top Ten Tapestry Segments Site vs. U.S.

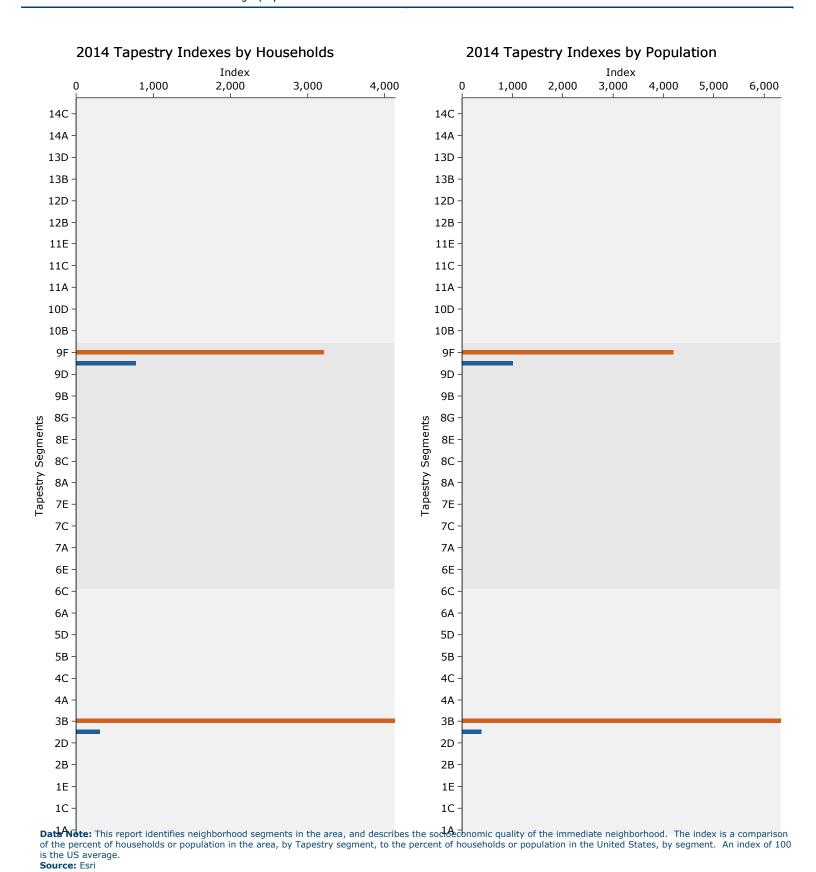

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.

#### Top Ten Tapestry Segments Site vs. U.S.

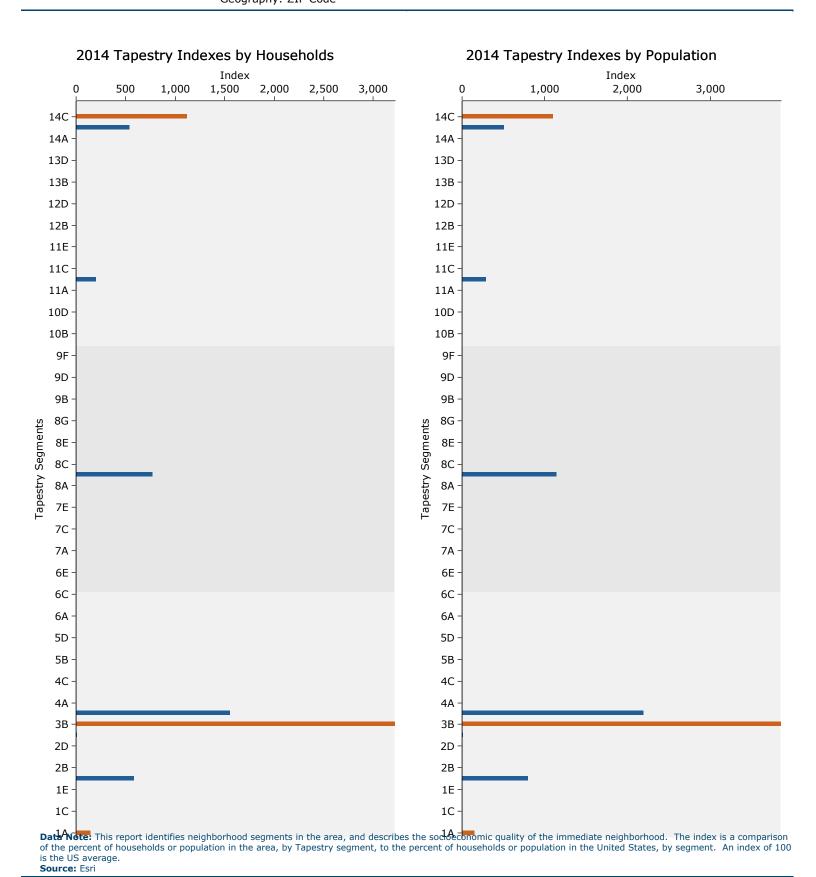

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.

**Data Note:** This report identifies neighborhood segments in the area, and describes the socioeconomic quality of the immediate neighborhood. The index is a comparison of the percent of households or population in the area, by Tapestry segment, to the percent of households or population in the United States, by segment. An index of 100 is the US average.
